

An aerial photograph of a city skyline, featuring a prominent, tall, slender skyscraper with a pointed top. The city is densely packed with various buildings, and mountains are visible in the background under a clear blue sky.

35
YEARS
OF EXCELLENCE

**THE SMART SOLUTION
FOR YOUR PROJECTS**

CITY LIFT
Performance in Motion

ELEVATOR | ESCALATOR | AUTOMATED CAR PARKING SYSTEMS

MISSION & VISION STATEMENT

MISSION

“ To create and sustain customer satisfaction through innovative products & prompt services at all times; and provide timely, effective & competitive response to customer needs & expectations. ”

VISION

“ To become the most trusted and reputed elevator and car parking company in India. ”

AT CITY LIFT, IT'S OUR PEOPLE & PROCESS THAT MAKES US DIFFERENT

WE ARE THE COMPLETE VERTICAL TRANSPORTATION SOLUTION PROVIDER

INTRODUCTION

- ✔ Founded in 1985, City Lift is one of the **most trusted names in tech-enabled elevator systems in India.**
- ✔ We have a **proven track record of 35 years** in Designing, Outsourcing, Marketing & Servicing internationally competitive vertical transportation products
- ✔ We provide solutions for Mid elevator to upper premium market with our brand Elite from Nidec, Japan. In this year 2020 CLIL has come up with solutions for Low and Mid rise building with brand Classic- especially made in India
- ✔ We have **strategic alliances with global elevator giants** for high speed Elevator to design and deliver customized elevator systems, irrespective of size and scale.
- ✔ We have **highly trained lift maintenance engineers** carrying out lift maintenance nationally in accordance with manufactures' guidelines.
- ✔ We provide the **highest customer service levels**, offering lift maintenance along with a highly efficient call out and lift repair service - available 24 hours a day, 365 days a year with very competitive pricing.

ELEVATOR: WE KEEP YOUR WORLD MOVING

NEXT-GENERATION MOBILITY TODAY

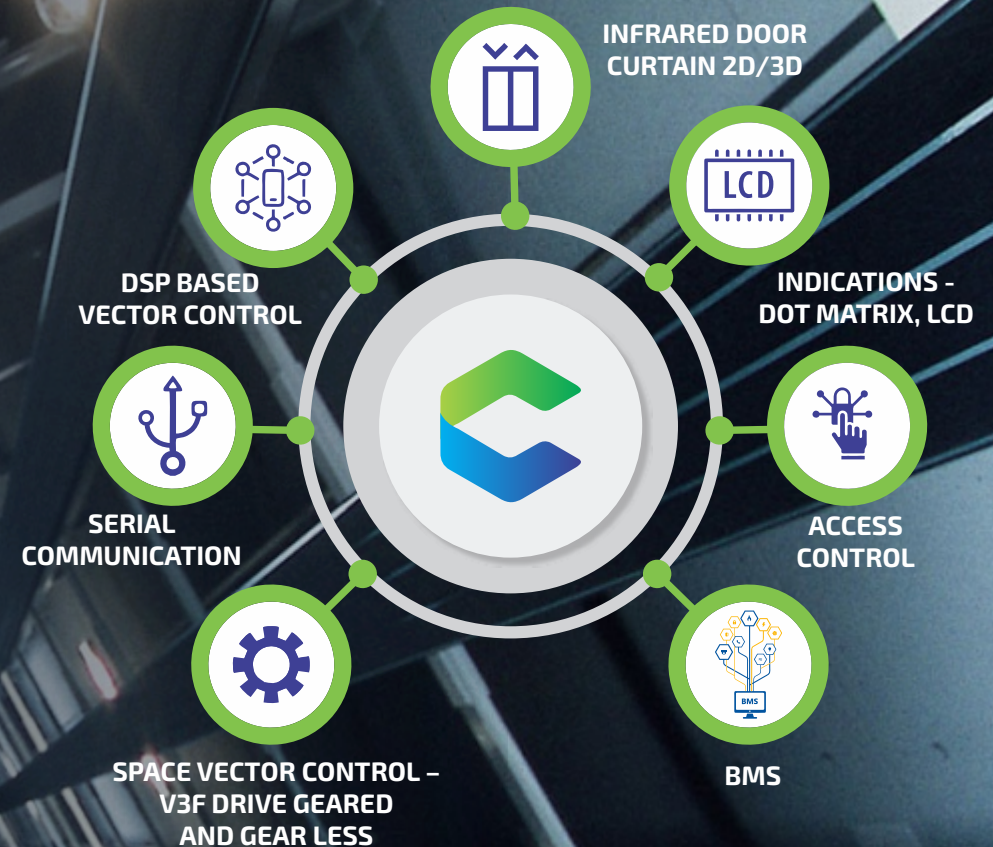

- ✔ Cutting-edge technologies are applied in our Manufacturer's products of all categories from super-high speed elevator systems to standard elevator and escalator range to realize the highest standards in optimum operation, reliability and passenger comfort.
- ✔ The products is latest technology in the industry. The latest generation of the AC Variable Voltage Variable Frequency Control (Inverter Drive) features an intelligent power module (power drive elements), an integration of processors for power converter control, drive-inverter control and speed control enables fully digital control for high speed, high reliability control and a smoother ride.

Our elevators are Workslclass

From residential and office buildings to shopping centers, hotels, hospitals, train stations and airports, our passenger and freight elevators deliver:

- ✔ Increased transport capacity
- ✔ Reduced space requirements
- ✔ Enhanced safety
- ✔ Improved energy efficiency

TECHNOLOGIES: OUR LATEST WORLD CLASS TECHNOLOGY IS OUR LIVING SECRET

MODERNISATION - A NEW EXPERIENCE OF STYLE N TECHNOLOGY

TIME FOR A GENERATION CHANGE WITH CITY LIFT

We have professional modernization team who will customize for you.

SOLUTION TAILORED TO MEET YOUR SPECIFIC NEEDS.

FREE CONSULTATION

We happily provide free diagnosis and preventive health check-up for your Elevators.

ENERGY EFFICIENT

Advanced technologies in our power systems (controller, machine, drive) and door operation can improve the traffic handling capacity and energy efficiency of your existing Elevator system.

MEGA SAVINGS

By improving the overall performance of your Elevator, our modernization solutions help you decrease your maintenance and utility costs.

CUSTOMIZING REQUIREMENT

Modernization with City Lift gives you the freedom to combine packages and products that bring you the latest technology at a value that fits your budget. Whatever the make, model, manufacturer or age of your Elevator.

BENEFITS OF MODERNISATION

- ✓ SMOOTH AND SILENT RIDE
- ✓ UNIQUE LEVEL OF SAFETY
- ✓ COST AND ENERGY SAVINGS
- ✓ ROBUST AND RELIABLE
- ✓ GREEN ENERGY
- ✓ STOPPING ACCURACY

MAINTENANCE & SERVICE'S EXCELLENCE MEANS RESPONSIVE COMMUNICATIONS

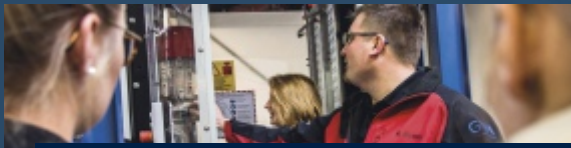

MAINTENANCE & SERVICE :

CITY LIFT ADVANTAGE

Providing a consistently high level of service with a cost-effective approach is critical in this industry. This is why our clients rely on us as a key partner in the servicing of elevators and escalators.

We enable maximum productivity by ensuring your equipment is performing at its absolute best. Our focus on exceeding expectations empowers our dedicated employees to deliver service excellence.

A. Professionals specially trained to handle these equipments available 24hrs on Site.

B. Specially designed and proprietary diagnostic equipment to troubleshoot and solve technical problems.

- ✓ SAFETY FIRST
- ✓ 35 YEARS OF SERVICE EXPERIENCE
- ✓ NATION WIDE SERVICE PROVIDER

C. Supply all genuine spare parts which are specially designed manufactured for elevators, escalators & car parking systems.

D. Confidential electronic security & engineering drawings issued by Manufacturers which are essential for the maintenance, service and repair.

E. Established networks of skilled personnel with the necessary experience, resources and logistics to provide 24 hours emergency service.

ONLINE AUTOMATIC RESCUE DEVICE (A.R.D.)

When the elevator is in motion, any power interruption results into stoppage of elevator between floors instantly and the passengers gets stuck till they are rescued. A.R.D. is a device that supplies alternative power source to the elevator during the power interruption. This device also ensures the elevator is moved to a safe landing and opens the door for evacuation following all the safety codes.

There are two types of A.R.D. :

1. Conventional A.R.D.

2. Online A.R.D.

In a conventional A.R.D., during the travel when the power interruption takes place, the lift abruptly stops with a jerk. In this situation, the conventional A.R.D. will provide the alternative power supply, move the elevator to a safe landing for passenger evacuation. In this case, stopping jerks, holdup time for changeover of power supply are involved which cause fear and trauma to the passengers. In case of higher elevator speeds, the stopping jerk will be felt severely by those passengers who are sick, senior & aged citizens and those having knee pain and other problems. To avoid and overcome this situation, online ARD is used. This device also ensures the elevator is moved to a safe landing and opens the door for evacuation following all the safety codes.

Online ARD, eliminates all the short-comings of conventional A.R.D. & any power interruption is instantly taken over by the ARD without any interruption in the travel. Passenger will not be aware that an interruption has taken place eliminating the drawbacks of the conventional ARD.

FIRE EVACUATION LIFTS MUMBAI'S LIFELINE FOR HIGH-RISE

FIRE EVACUATION LIFTS | FIRE EVACUATION LIFT REQUIREMENTS | EMERGENCY LIFTS

All the buildings that are taller than 70m (around 22 floors) to have a fire-resistant evacuation lift as per Development Control Rules (DCR) 2034. At the heart of this planning is the efficient dispersal of everyone within the building to a safe location, whilst avoiding 'bottlenecks' in corridors, or on stairways, which could cause panic, injuries or loss to life. Emergency planning has to take into special account the evacuation of disabled people who may not be able to access the fire exits without using vertical transport.

FEATURES

- ✓ Interface between the lift control system, fire detection and alarm system to support the evacuation management strategy.
- ✓ Both option for machine at ground floor and top with lowering device for vacuation.
- ✓ Fire retardant trailing cable and harness
- ✓ Emergency intercom system in all landings
- ✓ The lifts will have additional power backup.
- ✓ Two hour fire-resistant cabins and vision panel glass, which will help firemen reach to the affected floors and rescue victims.
- ✓ The lifts will reach the top floor from ground level within a minute," reads DCPR 2034.
- ✓ Residents can use the lifts on regular basis, so that it's maintained.
- ✓ Carrying capacity of minimum 8 person and above.

SERVICE SALES: LEADERSHIP THROUGH CUSTOMER SERVICE

COMPREHENSIVE MAINTENANCE

BENEFITS:

A. UNDIVIDED RESPONSIBILITY

Fully trained personnel look after planned, maintenance including replacement of worn parts, adjustments and safety checks.

B. EASIER BUDGETING

The equipment is maintained at known annual costs. No surprise bills, no complicated paperwork.

C. FULLY ORGANIZED SPARES SERVICE

Fully standardized spares and tools are available at all times from our store facilities and at our factories. Priority services are provided to our customers with extended comprehensive coverage.

D. REPAIRS

Repairs and replacement of every functional part of your equipment for e.g. hoisting ropes, governor ropes, traveling cable, motor, controller, door

Dedicated servicing and maintenance

24 hours emergency callback service are covered

Most major spare parts due to ordinary wear and tear are covered

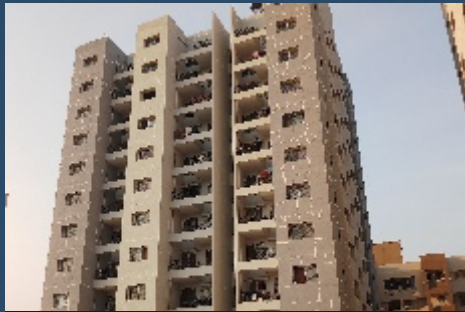

E. LONG TERM PROTECTION OF YOUR INVESTMENT

Regular, properly planned maintenance prolongs the life span of your equipment. Breakdowns (which are costly to put it right) and subsequent unplanned cost of equipment service is reduced to the minimum.
